

## **Amendments to the Specification**

Please amend paragraph [0035] as follows:

**Fig. 8** illustrates an exploded view of a standardized peripheral device **40** including a thermal management arrangement with a partition ~~42~~43 creating dual air flow chambers, a flow generating device **24**, an outlet vent **44**, and an inlet vent **45**, in accordance with an embodiment of the present invention. In this embodiment the flow generating device **24**, the integrated circuit **20**, and the board **16** may be substantially similar to the components depicted and discussed with reference to the above embodiments. However, the present embodiment includes a partition ~~42~~43 that may create dual air flow chambers in the interior of the standardized peripheral device **40**.
